ROADS AND TRACKS

- Metalled road
- Vehicle track
- Foot track
- Poled route; foot, vehicle

MISCELLANEOUS

- Large building
- Isolated building, hut
- Airstrip
- Helipad
- Beacon, tanks
- Mast, wind turbine
- Monument, plaque or signpost
- Ski tow
- Antarctic Specially Protected and Managed Area boundaries (ASPA156)

RELIEF FEATURES[1]

- Index contour
- Intermediate contours
- Perennial snow and ice contours
- Supplementary or indefinite contour
- Depression contours
- Shallow depression
- Elevation 130
- Crevasse
- Cliff, ice cliff
- Rock outcrops
- Saddle, cave
- Sand
- Alpine features
  - Moraine
  - Moraine wall
  - Scree

WATER FEATURES

- Fast or bay ice
- Coastline
- Ice shelf
- Disturbed ice
- Ice stream
- Melt stream

IMPORTANT INFORMATION:

1. Contours and spot elevations in snow areas may be less accurate.
2. The vertical interval between contours is 50 metres.
3. The location of tracks on sea ice is subject to annual change.
4. Representation on this map of a road or track does not necessarily indicate permitted access.
5. Absence of a crevasse symbol does not necessarily indicate a crevasse-free area.

ANTTopo50-MG08 Pivot Peak

Topo50 Map

Ross Sea Region McMurdo Sound

Pivot Peak

ANTTopo50-MG08 **1:50 000**

MF07 Quartermain Mountains	MF08 Taylor Glacier	MF09 Lake Bonney
MG07 Mount Feather	MG08 Pivot Peak	MG09 Mount Lister
MH07 Neve Nunatak	MH08 Halfway Nunatak	MH09 Mount Huggins

Land Information New Zealand
Toitū te whenua

New Zealand Government

SCALE 1:50 000

THE VERTICAL INTERVAL BETWEEN THE CONTOURS IS 20 OR 50 METRES
(See IMPORTANT INFORMATION panel for the vertical interval on this sheet)

1 0 1 2 3 4 5 6 7 8 9 10 kilometres

GRID NORTH
G.M. Angle
MAGNETIC NORTH at the centre of this map is 153° (2716 mils) EAST of GRID NORTH during 2011 increasing at the rate of approx ½°,(9 mils) over 3 years.
MAG. NORTH

HORIZONTAL DATUM: Ross Sea Region Geodetic Datum 2000 (RSRGD2000)
For practical purposes, RSRGD2000 equates to WGS84

VERTICAL DATUM: Mean Sea Level

PROJECTION: McMurdo Sound Lambert Conformal 2000 (MSLC2000)

PARAMETERS

Spheroid: GRS80
Origin Latitude: 78° South; Origin Longitude: 163° East
False Northing: 5 000 000mN; False Easting: 7 000 000mE
Standard Parallels: 76°40' South and 79°20' South
