GEOLOGICAL SURVEY

ANTARCTICA SKETCH MAP
SAUNDERS COAST–MARIE BYRD LAND

Polar Stereographic Projection
Standard Parallel 71° S

Scale 1:500,000

Compiled by the Geological Survey in cooperation with the National Science Foundation in support of scientific activities of the United States Antarctic Research Program

Control by USGS 1959–1960

Compiled in 1965 from U.S. Navy tricamera aerial photography 1962-1965

This map is part of a sketch map series utilizing best source data and control available at time of compilation. Features shown on this map may be subject to redelineation when this area is mapped as part of the 1:250,000 scale reconnaissance series

Names approved by the U.S. Board on Geographic Names

LEGEND

Control (elevation in meters) ▲2467
Unmonumented control (elevation in meters) △1730
Intersected point (elevation in meters) ↓1180
Photo center (USGS flight numbers as indicated) ○372
Penguin rookery (Adélie, Emperor)
Ice free area
Meltwater lake and stream
Glacier flow
Nunataks and peaks
Moraine
Ridge top with foot of slope
Escarpment
Slope
Crevasses
Islands (not plottable to scale)

Note: Absence of crevasse symbol does not necessarily indicate a crevasse-free area

INDEX TO ADJOINING SHEETS

LOCATION DIAGRAM

PHOTOGRAPHIC RUNS

TMA numbers above and in body of map identify each tricamera run used in the compilation of this map. Numbers alongside open circles in body of map locate center of vertical photographs selected with sufficient frequency to serve as a reference index
