DEPARTMENT OF THE INTERIOR
UNITED STATES GEOLOGICAL SURVEY

ROSS ISLAND and VICINITY, ANTARCTICA

CONVERSION SCALE
Meters | Feet

MAGNETIC DECLINATION

Isogonic lines compiled from D.M.A.H.C. Chart 43, 1985

INDEX TO STANDARD 1:250 000-SCALE MAPS

Sheet numbering system based on International Map of the World

LEGEND

Contour lines
(definite)
(approximate)
(conjectural)
Cliff or escarpment
Steep slope
Small hillock
Intersected elevations
Photogrammetric elevations
Ice thickness
Astro control station
Survey control stations
Traverse route with spot height
Moraine
Glacier
Crevasses
Coastline under ice
Ice shelf
Icebergs
Fast or bay ice

Ice area | Ice-free area

Produced by the United States Geological Survey in cooperation with the National Science Foundation

Control by U. S. Geological Survey and U. S. Naval Oceanographic Office

Compiled from USGS 1:250 000-scale topographic maps dated 1962 and 1970

Hydrographic data by U. S. Naval Oceanographic Office
This information is not intended for navigational purposes

Names approved by U. S. Board on Geographic Names

Absence of the crevasse symbol does not necessarily indicate a crevasse-free area
