TO GIVE A STANDARD REFERENCE ON THIS SHEET TO NEAREST 1,000 METERS:

SAMPLE POINT: △ 555

1. Read letters identifying 100,000 meter square in which the point lies: EV
2. Locate first VERTICAL grid line to LEFT of point and read LARGE figure labeling the line either in the top or bottom margin, or on the line itself: 1
   Estimate tenths from grid line to point: 2
3. Locate first HORIZONTAL grid line BELOW point and read LARGE figure labeling the line either in the left or right margin, or on the line itself: 9
   Estimate tenths from grid line to point: 4

SAMPLE REFERENCE: EV1294
